

Book of Lore Migration Guide

The book of lore is moving from Kusama to Moonbeam, where it will receive new utility. Follow the steps below to migrate your books and pages.

The migration process works with books with no pages, books with pages and single pages. Any nested NFT not related to the collection will be lost, so make sure to unnest them first.

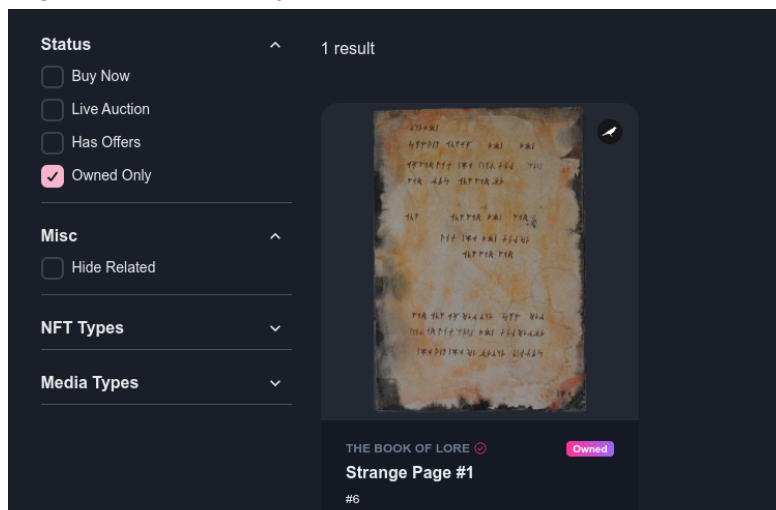

Step 1

Go to The Book Of Lore collection in Singular, link [here](#)

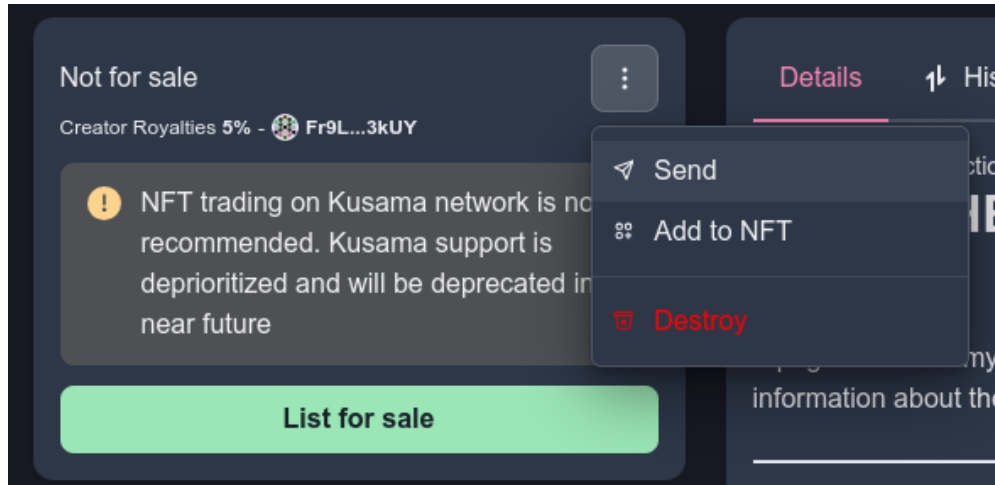

Step 2

Filter your owned Books and pages with the “Owned Only” book. Then open the NFT you want to migrate. If a book has strange pages you do not to unequip nor unnest, you will receive the pages equipped into your book on Moonbeam.

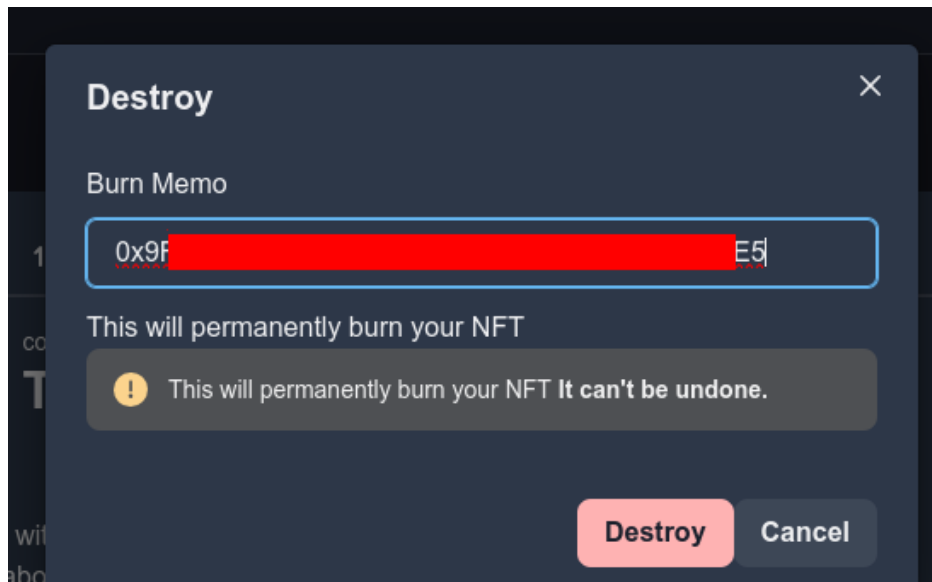

Step 3

On the left bar, click the 3 dots and then on Destroy.

Step 4

Insert your EVM address as Burn Memo. **DOUBLE CHECK IT**, if you do not set a valid EVM address you will lose your NFT. It should start with 0x and be 42 characters long.

Step 5

Wait for your NFT to appear on Moonbeam. Initially a migration will run every 24 hours, moving to weekly after the first month.
